All the key areas of accountancy are covered in this very readable book. We look at how accounts are prepared and the ways in which they are used. They can monitor the health and progress of a business. Things can go wrong – we consider what happens then.

Accountancy has become one of the world's leading professions. We find out why and what the many different types of accountant do. We see how they train and qualify. We look at the structure of the profession and the different firms operating within it, from huge multi-national operations to one-person practices.

● We look into the future of accountancy.

The author

Mark Etchells qualified as an accountant with one of the giants of the accounting world and worked there for eight years. Since then he has had wide experience working as an accountant in a number of different businesses, small and large, in the UK and abroad. This has involved different business sectors.

Mark has worked in a company which supports the financial systems used by many businesses in the UK. This has given him a close insight into the challenges they face, and the technology now available to deal with some of the problems. Accountancy now operates very much in the computer age.

Every **Quicklook** book explains the basics of a big subject in a read of not more than 90 minutes – even for readers with no prior knowledge.

The books are of general interest but should be particularly useful to those entering the world of work.
